

MOHAMAD NADEEM MEMON

Software QA / Test Engineer

Karjan, Vadodara, Gujarat, India · +91 76219 92737 · nadeemmemon735@gmail.com · github.com/nadeem12-cloud · linkedin.com/in/nadeem10

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student (CVM University) with a portfolio of independently built and deployed full-stack and ML applications. Skilled in Python, Flask, FastAPI, and REST APIs, with hands-on experience debugging live production systems, validating data integrity, and catching edge cases across multi-page, multi-module apps. Seeking a Software QA / Testing role to bring a builder's attention to detail to structured test planning and quality assurance.

EDUCATION

B.Tech in Computer Science Engineering — 2024–2027 (Expected)

Madhuben & Bhanubhai Patel Institute of Technology (MBIT), CVM University — Vallabh Vidyanagar, Gujarat · GPA: 7.21 · Lateral Entry via Diploma

Diploma in Computer Science Engineering — 2021–2024

Parul University, Vadodara

TECHNICAL SKILLS

Testing & QA: Manual & Functional Testing, Regression Testing, Test Case Design & Validation, API Testing, Bug Tracking & Issue Documentation, UI Testing, SDLC/STLC & Agile Familiarity

Languages: Python, JavaScript, C

ML & Data Science: Scikit-learn, XGBoost, SHAP, Pandas, NumPy, Sentence Transformers, TF-IDF, Joblib

Frontend: HTML5, CSS3, Streamlit, Chart.js, Vanilla JS

Backend & Databases: Flask, FastAPI, SQLite, PostgreSQL (pgvector), Firebase Firestore, MySQL, REST APIs

Tools & Platforms: Git, GitHub, VS Code, PythonAnywhere, Streamlit Cloud, Firebase Hosting, Vercel

Concepts: ATS ML Pipelines, SHAP Explainability, Session Auth, CRUD, WSGI Deployment, OAuth2, pgvector Semantic Search

PROJECTS

IPL Match Predictor — ipl-predictor-79.streamlit.app

Python · XGBoost · SHAP · Streamlit · ESPN Cricinfo API · Streamlit Cloud

- Built an end-to-end ML pipeline with XGBoost, validating performance (~62% accuracy, 0.69 ROC-AUC) on a strictly held-out 2023+ test set to guard against data leakage.
- Engineered 13 domain-specific features including venue, team form, head-to-head record, and weather/dew conditions.
- Integrated SHAP explainability (native `pred_contribs`) to verify per-feature contribution behind every prediction; added and tested live IPL 2026 squad data via ESPN Cricinfo integration.

CareerIQ — AI Career Intelligence Platform — careeriq-mkv.streamlit.app

Python · Scikit-learn · TF-IDF · Twilio API · APScheduler · Streamlit Cloud

- Built an end-to-end ML pipeline analysing 30,000+ real job listings to surface in-demand skills and market trends.
- Integrated and tested the Twilio API for automated WhatsApp/SMS job alerts (via APScheduler); diagnosed and resolved dependency conflicts for a stable, secrets-secured Streamlit Cloud release.

Digital Mushayara — Poetry Publishing Platform — nadeemmemon.pythonanywhere.com

Python · Flask · SQLite · HTML/CSS/JS · Google Drive API · PythonAnywhere

- Built a full-stack web app to publish and manage 261+ Urdu/Hindi shaayaris with a custom CMS admin panel and draft/publish workflow.
- Implemented and tested session-based authentication (SHA-256) and comment moderation to maintain data integrity across all live entries, including Surprise Me, Featured Shaayari, Saved Shaayaris, and Stats Dashboard features.
- Automated and verified weekly Google Drive backups via Google Drive API v3 with OAuth2; deployed via WSGI on PythonAnywhere.

OfferSense — Salary Literacy Tool for Indian Freshers — <https://offer-sense-zeta.vercel.app/>

HTML · Vanilla JS · Chart.js · FastAPI · Vercel

- Built a CTC/LPA breakdown tool with offer comparator and increment simulator for Indian fresher salary negotiation.
- Validated CTC/LPA calculations across old vs. new tax regimes and PF-deduction toggle scenarios, catching edge cases in the salary-breakdown logic; added PDF export.
- Deployed on Vercel; frontend-only version uses plain HTML/Vanilla JS with Chart.js for visualisations.

AttendGuard — Attendance Tracking Web App — attendguard.web.app

HTML · CSS · JavaScript · Firebase Firestore · Chart.js · Firebase Hosting

- Rebuilt the full attendance-tracking app from scratch (dark/light theme, custom CSS variables, 10 pages); integrated Firebase Firestore and tested real-time sync accuracy and analytics-dashboard (Chart.js) rendering.

INTERNSHIP EXPERIENCE

Software Intern · Thunking Tech · Remote

May 2026 – June 2026

Built VidMind, a Generative AI video summarizer using LLMs for long-form YouTube content summarization.

- Implemented transcript extraction, semantic chunking, and context-aware summarization pipelines using Groq, Whisper, and LLaMA.
- Improved content accessibility and reduced information overload through AI-driven summarization with a Streamlit UI.

IT Intern · Apex Multispeciality & Trauma Centre · On-site, Bharuch

May 2026 – June 2026

Developed HeartCare HMS, a cardiac-themed Hospital Management System covering patient records, appointments, billing, and staff workflows across 8 modules.

- Designed modules for patient registration, doctor scheduling, and medical record handling using Flask and SQLite. Collaborated with hospital staff to map and improve operational workflows for real clinical use.
