

Mohamad Nadeem Memon

Karjan, Vadodara, Gujarat, India · +91 76219 92737 · nadeemmemon735@gmail.com · github.com/nadeem12-cloud · linkedin.com/in/nadeem10

PROFESSIONAL SUMMARY

Final year B.Tech Computer Science student (CVM University) with a strong portfolio of independently built and deployed ML and full-stack applications. Experienced in Python, machine learning pipelines, Flask, Streamlit, Firebase, and REST APIs. Proven ability to deliver end-to-end products — from concept to live deployment — with real users. Seeking internship roles in Data Science, ML, or Python Development.

EDUCATION

B.Tech in Computer Science Engineering 2024 – 2027 (Expected)
Madhuben & Bhanubhai Patel Institute of Technology (MBIT), CVM University — Vallabh Vidyanagar, Gujarat · GPA: 7.21 · Lateral Entry via Diploma

Diploma in Computer Science Engineering 2021 – 2024
Parul University, Vadodara

TECHNICAL SKILLS

Languages: Python, JavaScript, C

ML & Data Science: Scikit-learn, XGBoost, SHAP, Pandas, NumPy, Sentence Transformers, TF-IDF, Joblib

Frontend: HTML5, CSS3, Streamlit, Chart.js, Vanilla JS

Backend & Databases: Flask, FastAPI, SQLite, PostgreSQL (pgvector), Firebase Firestore, MySQL, REST APIs

Tools & Platforms: Git, GitHub, VS Code, PythonAnywhere, Streamlit Cloud, Firebase Hosting, Vercel

Concepts: ATS ML Pipelines, SHAP Explainability, Session Auth, CRUD, WSGI Deployment, OAuth2, pgvector Semantic Search

PROJECTS

IPL Match Predictor — ipl-predictor-79.streamlit.app

Python · XGBoost · SHAP · Streamlit · ESPN Cricinfo API · Streamlit Cloud

Built an end-to-end ML pipeline with XGBoost achieving ~62% accuracy and 0.69 ROC-AUC on 2023+ held-out test data. Engineered 13 domain-specific features including venue, team form, head-to-head record, and weather/dew conditions. Integrated SHAP explainability (native pred_contribs) to show per-feature contribution for every prediction. Added live IPL 2026 squad data post-auction; fetches real-time match data via ESPN Cricinfo integration.

CareerIQ — AI Career Intelligence Platform — careeriq-mkv.streamlit.app

Python · Scikit-learn · TF-IDF · Twilio API · APScheduler · Streamlit Cloud

Built an end-to-end ML pipeline analysing 30,000+ real job listings to surface in-demand skills and market trends. Integrated Twilio API for automated WhatsApp/SMS notifications with APScheduler for periodic job alerts. Deployed live on Streamlit Cloud with dependency conflict resolution and secure secrets management.

Digital Mushayara — Poetry Publishing Platform — nadeemmemon.pythonanywhere.com

Python · Flask · SQLite · HTML/CSS/JS · Google Drive API · PythonAnywhere

Built a full-stack web app to publish and manage 261+ Urdu/Hindi shaayaris with a custom CMS admin panel and draft/publish workflow.

Implemented session-based auth (SHA-256), comment moderation, reaction notifications, and shareable slug URLs.

Added Surprise Me, Featured Shaayari, Saved Shaayaris (localStorage), Stats Dashboard, and Reading Mode — frontend only.

Automated weekly Google Drive backups via Google Drive API v3 with OAuth2; deployed via WSGI on PythonAnywhere.

BookSoul — Book Personality & Recommendation Engine — github.com/nadeem12-cloud

Python · FastAPI · PostgreSQL · pgvector · Sentence Transformers · Big Five Personality Engine · (GitHub: coming soon)

Architected a FastAPI + PostgreSQL backend with pgvector for semantic similarity search on the goodbooks-10k dataset.

Implemented a Big Five personality inference engine that maps reading history to personality traits and recommends books.

Integrated Sentence Transformers for embedding-based book similarity beyond simple collaborative filtering.

OfferSense — Salary Literacy Tool for Indian Freshers — github.com/nadeem12-cloud

HTML · Vanilla JS · Chart.js · FastAPI · Vercel

Built a CTC/LPA breakdown tool with offer comparator and increment simulator for Indian fresher salary negotiation.

FastAPI backend version includes new vs old tax regime toggle, PF deduction toggle, and PDF export.

Deployed on Vercel; frontend-only version uses plain HTML/Vanilla JS with Chart.js for visualisations.

AttendGuard — Attendance Tracking Web App — attendguard.web.app

HTML · CSS · JavaScript · Firebase Firestore · Chart.js · Firebase Hosting

Rebuilt full attendance tracking app from scratch with dark/light theme toggle using custom CSS variables across 10 pages.

Integrated Firebase Firestore for real-time data storage and built analytics dashboard with subject-wise Chart.js visualisations.

INTERNSHIP EXPERIENCE

Web Development Intern · Web Eleven · Surat

2023

Customised WordPress themes and templates for client websites; optimised site performance and SEO.

Collaborated with UI/UX teams to deliver responsive, accessible web designs and resolved plugin conflicts.

CERTIFICATIONS & ACHIEVEMENTS

- AI Fluency for Students — *Anthropic*
- AWS Cloud Computing Fundamentals — *Amazon Web Services*
- Python for Data Science — *Internshala*
- SAP Code Unnati — *SAP*
