SUMMARY

Computer Science undergraduate who builds, tests, and ships full-stack and ML applications end to end. Strong in Python, REST APIs, and data-driven features, with a tester's habit of validating edge cases, data integrity, and live behaviour. Deployed 5 live applications across Vercel, Streamlit Cloud, PythonAnywhere, and Firebase, and completed two internships delivering an LLM video-summarization pipeline and an 8-module hospital management system.

SKILLS

Languages: Python, JavaScript, C, SQL

Backend & APIs: Flask, FastAPI, REST APIs, session authentication, OAuth2

Frontend: HTML5, CSS3, Vanilla JS, Chart.js, Streamlit

Data / ML: Pandas, NumPy, Scikit-learn, XGBoost, SHAP, TF-IDF, Sentence Transformers, pgvector, Groq, Whisper, LLaMA

Databases: SQLite, MySQL, PostgreSQL, Firebase Firestore

Testing: Manual & functional testing, regression testing, test case design, API testing, bug tracking, UI testing, SDLC/STLC, Agile

Cloud & Tools: Git, GitHub, VS Code, Vercel, Streamlit Cloud, PythonAnywhere (WSGI), Firebase Hosting, AWS fundamentals, APScheduler, Twilio, Google Drive API

EXPERIENCE

Software Intern — Thunking Tech (Remote)

May 2026 – June 2026

- Built VidMind, a generative AI video summarizer for long-form YouTube content, using LLMs.
- Implemented transcript extraction, semantic chunking, and context-aware summarization pipelines with Groq, Whisper, and LLaMA.
- Delivered a Streamlit UI that reduced information overload through AI-driven summaries.

IT Intern — Apex Multispeciality & Trauma Centre (On-site, Bharuch)

May 2026 – June 2026

- Developed HeartCare HMS, a hospital management system covering patient records, appointments, billing, and staff workflows across 8 modules.
- Designed patient registration, doctor scheduling, and medical record modules using Flask and SQLite.
- Collaborated with hospital staff to map and improve operational workflows for real clinical use.

PROJECTS

IPL Match Predictor

ipl-predictor-79.streamlit.app

Python, XGBoost, SHAP, Streamlit, ESPN Cricinfo API, Streamlit Cloud

- Built an end-to-end ML pipeline with XGBoost, validated at ~62% accuracy and 0.69 ROC-AUC on a strictly held-out 2023+ test set to guard against data leakage.
- Engineered 13 domain-specific features (venue, team form, head-to-head, weather/dew) and integrated SHAP to verify per-feature contributions.
- Added and tested live IPL 2026 squad data via ESPN Cricinfo integration.

CareerIQ — AI Career Intelligence Platform

careeri-q-mkv.streamlit.app

Python, Scikit-learn, TF-IDF, Twilio API, APScheduler, Streamlit Cloud

- Built an ML pipeline analysing 30,000+ real job listings to surface in-demand skills and market trends.
- Integrated and tested Twilio WhatsApp/SMS job alerts scheduled with APScheduler; resolved dependency conflicts for a stable, secrets-secured release.

Digital Mushayara — Poetry Publishing Platform

nadeemmemon.pythonanywhere.com

Python, Flask, SQLite, HTML/CSS/JS, Google Drive API, PythonAnywhere

- Built a full-stack app to publish and manage 261+ Urdu/Hindi shaayaris with a custom CMS admin panel and draft/publish workflow.
- Implemented and tested hashed-credential session authentication and comment moderation across all live entries.
- Automated weekly Google Drive backups via Drive API v3 with OAuth2; deployed via WSGI.

OfferSense — Salary Literacy Tool for Indian Freshers

offer-sense-zeta.vercel.app

HTML, Vanilla JS, Chart.js, FastAPI, Vercel

- Built a CTC/LPA breakdown tool with offer comparator, increment simulator, and PDF export.
- Validated calculations across old vs. new tax regimes and PF-deduction toggles, catching edge cases in the breakdown logic.

AttendGuard — Attendance Tracking Web App

attendguard.web.app

HTML, CSS, JavaScript, Firebase Firestore, Chart.js, Firebase Hosting

- Rebuilt a 10-page attendance app from scratch with dark/light theme; tested real-time Firestore sync and Chart.js dashboard rendering.

EDUCATION

B.Tech, Computer Science Engineering — MBIT, CVM University, Vallabh Vidyanagar

2024 – 2027 (Expected)

GPA: 7.81 | Lateral entry via Diploma

Diploma, Computer Science Engineering — Parul University, Vadodara

2021 – 2024

CERTIFICATIONS

AI Fluency for Students (Anthropic) | AWS Cloud Computing Fundamentals (AWS) | Python for Data Science (Internshala) | SAP Code Unnati (SAP)

Languages: English, Hindi, Gujarati, Urdu
